

Best office in the world

WE'VE SEEN SOME sales gimmicks in our time, but you have to hand it to Abel Point Marina Sales Consultant, Kevin Mason, who sent in this photo of him with the "the best office in the world". During the 2010 Meridien Marinas Airlie Beach Race Week which is held annually at the Abel Point Marina in Airlie Beach, Mr. Mason moved his office outside onto the prime waterfront location of one of the berthing arms.

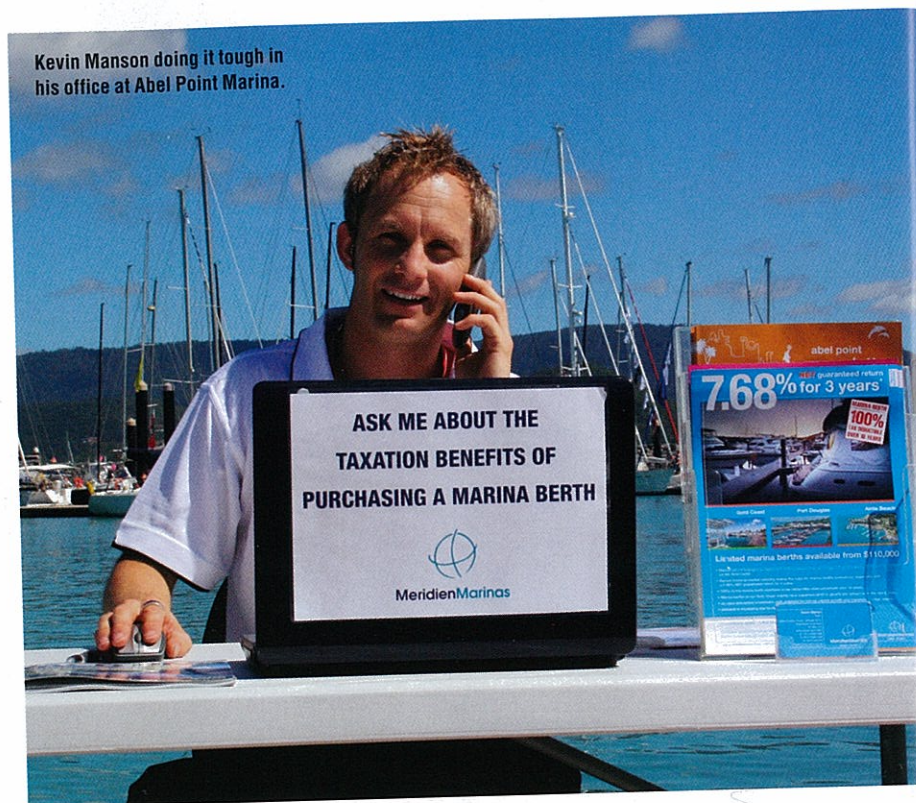

"I wanted to be amongst the action and excitement of Airlie Beach Race Week and try and sell some berths while out here," said Mr Mason. "I didn't see the point of sitting inside the office when I could enjoy the open air and spectacular views of the action-packed Abel Point marina and Whitsunday Islands.

Meridien Marinas is said to be Australia's largest marina developer, owner and operator with marinas also located in Port Douglas, the Gold Coast and Sydney.

In addition to \$20 million in berth sales, Meridien Marina's largest development Port of Airlie in Airlie Beach has also achieved in excess of \$10 million in Superyacht berth (30+ metres) sales.

The first stage of the marina opened recently and included marina berths ranging in size from 12 to 24 metres, with the further stages incorporating larger berths up to 50 metres to be completed in the near future.

For more information on berth sales, contact Kevin 'best office' Mason on (07) 4948 2669 or email kmason@meridien.com.au.

Tough, flexible G/flex

G/FLEX 650 IS the latest addition to the West System range of epoxy products. West System advise that G/flex 650 is the result of years of experimentation to develop a toughened epoxy that was simple to use, viscous enough not to drain out of a joint, and would adhere to a variety of materials under difficult conditions.

This advanced formula is said to be resilient enough to absorb the stress of expansion, contraction, shock and vibration. G/flex offers a superior grip to aluminium and other metals, plastics, fiberglass, ceramic, masonry, glass, and damp wood. It can also be used as a coating or modified with West System fillers and additives, and used to wet-out fiberglass tapes and fabrics.

G/flex 650 is a two part system with a user-friendly 1:1 mix ratio. Available through Australian West System dealers, G/flex 650 comes in easy-to-dispense squeeze bottles in 250ml and 1 litre packs.

For more information on G/Flex epoxy resin and hardener contact ATL Composites on (07) 5563 1222 or visit www.westsystem.com.au.
